Hand Sanitiser

Exclusive
to Eschmann

The Eschmann range of hand sanitiser is made to World Health Organisation recommended standards and contains 70% alcohol, killing 99.9% of bacteria and viruses.

Made in Britain and certified to European standards BSEN 1276 and BSEN 1500, our hand sanitiser ingredients include Coconut Oil to protect your hands from damage caused by long-term use.

Hand Sanitiser

Eschmann Hand Sanitiser is sourced in the UK to our own specific requirements.

Good hand hygiene is an essential measure you can take to help prevent and control the spread of viruses.

Alcohol based hand sanitiser kills pathogens on the skin. To be most effective, hand sanitisers must have an alcohol content of at least 60%.

Eschmann Hand Sanitiser, in liquid gel form, contains 70% alcohol and includes Coconut Oil to protect your hands from damage often experienced with long-term use.

Ingredients: Alcohol 70%, Demin Water, Hydrogen Peroxide, Glycerine, Monopropylene Glycol, Fractionated Coconut Oil, Isopropyl Myristate, Carbopol, Aculyn, Triethanolamine.
